

### **1. Don't take risks with your health**

If you're not feeling 100% fit and well, please stay at home. If you have any concerns or feel something coming on, err on the side of caution.

### **2. QLD Government Health Advice**

We are following the health advice of QLD Health

**Please note that due to current Government Covid restrictions you will only be able to attend if you are double dosed.**

A full list and details can be found on this [link](#)

### **3. Social Distancing Class Measures**

- Please ensure you sign into the class each day using the QLD Health App
- Our class setup will be different from past classes with each student having their own individual desk, glasses and spittoons.
- We will be using disposable spittoons during the course. Please dispose of your own spittoon during the break in the sink adjacent to conference room. Fresh / new spittoons will be available throughout the course
- All samples will be poured by your educator, so you won't need to pass bottles between one another. We'll display the bottles on a table at the front so that you can take a look at the labels, but we'll ask you not to pick up/handle the bottles

We hope that this plan has reassured you that we'll be providing a safe environment for your course. But we also know that many of you have chosen to study with us purely for the enjoyment of learning in the company of other like-minded people, and we really don't want to lose that in amongst all the safety measures.

Don't worry, the wine will be just as delicious, the course content will be just as fresh, and our educators will be keener than ever to share their passion for their subject with the classroom.
